TECH SKILLS

- **Programming Languages**:Java, C++, C#, PHP
- **Web Development**: HTML, CSS, JavaScript, React
- **Mobile Development**:Flutter, React Native, Android (Java, SQLite)
- **Backend Development**:Spring Boot, Node.js, Express.js
- **Database Technologies**:MySQL, MongoDB, SQLite
- **Core Concepts**: Data Structures, Algorithms, Object-Oriented Programming (OOP), Microservices Architecture
- **Tools & Technologies:**Git, GitHub, REST APIs, Postman

SOFT SKILLS

- Teamwork
- Time Management
- Ability to Work Under Pressure
- Effective Communication
- Critical Thinking

PROFILE

Software Engineering undergraduate with hands-on experience in full-stack and cross-platform mobile application development. Skilled in Java, Spring Boot, React, and Flutter, with a solid foundation in data structures and algorithms. Experienced in building real-world systems, including AI-integrated healthcare applications and microservices-based platforms. Passionate about developing scalable solutions and seeking an internship to apply technical expertise and grow in a professional environment.

EDUCATION

Higher National Diploma in Software Engineering(Currently pursuing) 2025
School of Computing| NIBM

Diploma in Software Engineering 2024
School of Computing| NIBM
GPA: 3.7/4.0

Diploma in English 2023
ESOFT Metro Campus
GPA: *Merit*

Veyangoda central college 2019 - 2023
GCE Advanced Level.
GCE Ordinary Level.

PROJECTS

LifeLink - AI-Integrated Smart Blood & Organ Donation System FEBRUARY 2026 MARCH 2026

- Developed a full-stack mobile and web-based healthcare platform for real-time donor-recipient matching
- Implemented AI-based prediction for organ health and donor eligibility
- Integrated real-time alerts, GPS-based matching, and AI chatbot support
- Ensured secure data handling using RBAC and followed Agile development practices

Technologies Used: *Flutter, React, Node.js, MongoDB, REST APIs*

Pizza mania mobile app
SEPTEMBER 2025

- Developed an Android application with user authentication system
- Implemented login, registration, and navigation functionalities using SQLite
- Designed mobile UI for smooth user experience

Technologies Used: *JAVA, SQLite*

Factory-Management-System-Through-Micro-Service
JUNE 2025

- Collaborated in a team to develop a microservices-based factory management system
- Designed modules for production tracking, employee management, and inventory control
- Implemented real-time data tracking to improve operational efficiency
- Developed frontend and backend integration using RESTful APIs

Technologies Used: *React, Node.js, MYSQL, Stripe API*

Hotel Management System - Omic Family Restaurant
AUGUST 2025 - OCTOBER 2025

- Developed a web-based hotel management system for room booking and food ordering
- Implemented staff management, inventory tracking, and billing functionalities
- Designed and managed a relational database for system operations

Technologies Used: *HTML, CSS, PHP, JavaScript, MYSQL*

ACHIEVEMENTS & HACKATHONS

Dev{thon} 3.0 – Web Development Competition (Semi-Finalist)

- Reached semi-finals in a national-level web development competition organized by UoM Leos, SLTC Leos, and UoM Rotaractors
- Demonstrated strong web development, problem-solving, and teamwork skills

Recognized for academic excellence and maintained a GPA of 3.8/4.0 in my Diploma.

Appointed as Captain of the School Cricket Team (Under 13, Under 15, and Under 17), demonstrating strong leadership, teamwork, and strategic decision-making across multiple age categories.

CAREER OBJECTIVE

The main aim is to obtain a position as a software engineer intern that would enable me to utilize the skills I have developed in full-stack development, mobile development, and backend development, as well as provide an opportunity to gain industry experience and develop expertise in creating scalable and efficient software solutions.
